# PLANNING & DESIGN

Using our internal capabilities and our 30 years' experience in design and implementation of storage rooms and clinical areas, we will **enhance your facility design process and provide you with dedicated cost-effective storage solutions** for each of the areas where disposables and medication need to be stored and dispatched.

By using AutoCad design blocks, Revit files and 3D drawings we can assist your equipment planner/architect during the design phase with full room layouts.

Our storage experts will work closely with your supply chain team and clinical staff to ensure the most cost effective and efficient design is created to meet your needs.

## OUR WORK PROCESS

### STEP 1

Perform a physical walk-through and assessment of all relevant storage locations & create CAD drawings for each storage location

OR

Receive facility CAD files from the architects

### STEP 2

Lay out the storage unit blocks in CAD drawings according to customer needs

### STEP 3

3D room illustrations to end users

**STEP 4**

Customer feedback

**STEP 5**

Integration of  
customer feedback to  
the suggested design

**STEP 6**

Performing TURN-KEY  
Kanban Installation

# CATH LAB INSTALLATION

USING A PROVEN TRACK RECORD, WE WILL ASSIST IN PLANNING YOUR STORAGE AREAS THROUGHOUT YOUR NEW OR RENOVATED FACILITY

# WORKSPACE UTILIZATION

Gaps or dead air spaces are required between shelves in order to enable access to the products at the back of the shelves

Products on top levels can not be easily accessed

1 SQM/SQF of flat shelving foot print

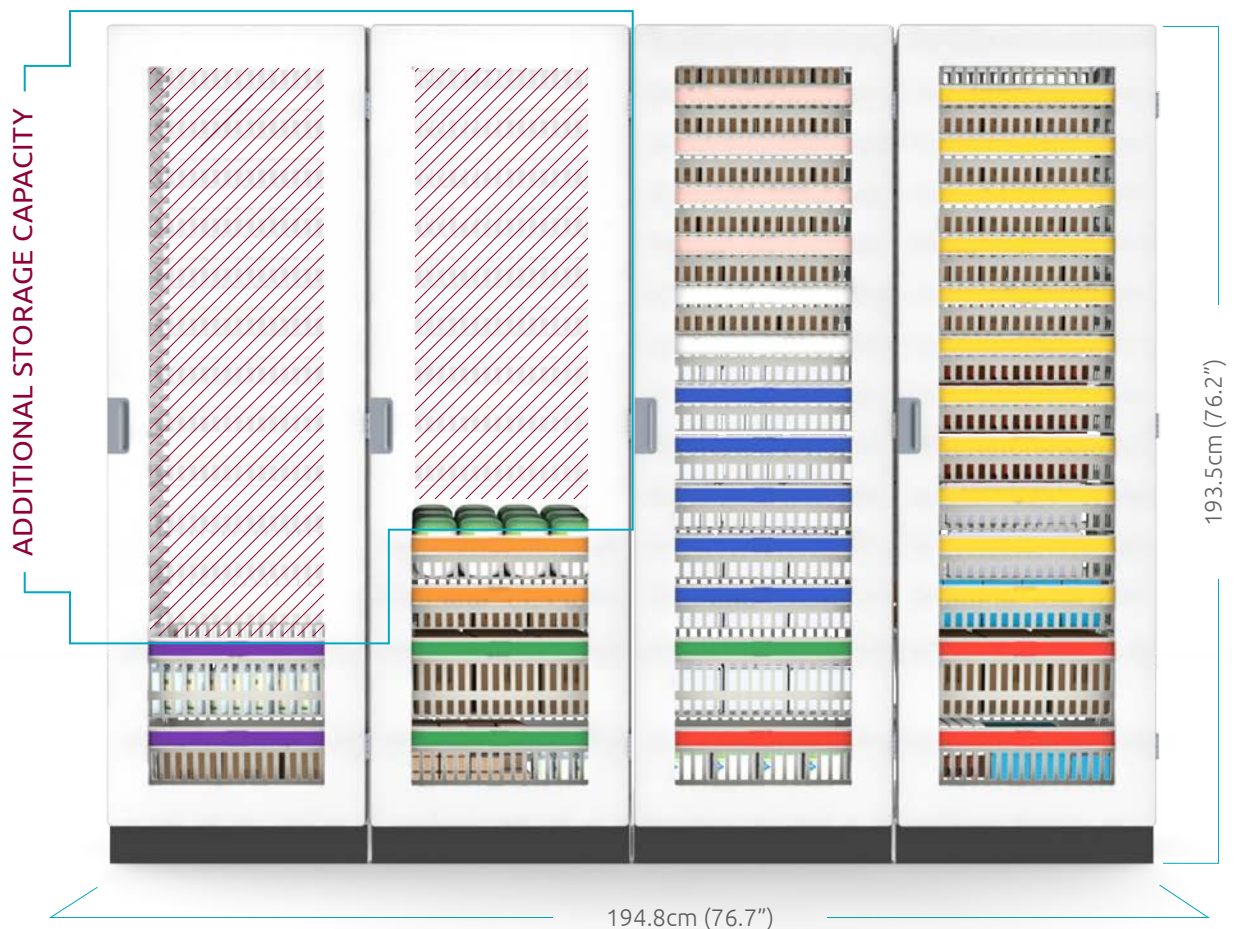

Dead spaces

Baskets are fully retractable - hence, no gaps are needed between the baskets, no space is wasted and easy access to supplies at the back of the basket is assured

Clear line of sight, easy and ergonomic access to all baskets at the higher levels

Can be decreased into 0.65 SQM/SQF footprint of dense storage

33% to 50% more storage space per sqt/sqm

# UNIQUE FEATURES

## QUIET CLOSURE

All around polymer dust and noise reduction seal

## PULL & TILT

While opening the baskets on the upper levels, the baskets will be tilted 116 degrees, enabling a line of sight and easy removal of products

## RIGID STRUCTURE

Fully glued corpus, 19mm European dense chipboard

## TOE KICK

10 cm of laminated plywood plinth with a set of levelling feet
